

Sprint 1 & Sprint 2 Developer Test Case Table

This developer test case table documents the Sprint 1 & Sprint 2 automated TDD, unit, and API tests created and executed at code level. The tests were executed using Jest through npm test. The terminal evidence confirms 5 passed test suites and 71 passed automated tests.

Evidence reference for all rows: terminal screenshot showing npm test completed successfully with 5 passed test suites and 71 passed automated tests.

Test ID	Related User Story	Feature/Module	Test Scenario	Test Data	Test Steps / Test Script	Expected Result	Actual Result	Status	Evidence Reference
UT-01	User registration/login	Email validation	Reject invalid email addresses	student@gmail.com; student@icbt.lk	Run automated validator test in server/___tests___/validators.test.js	Only valid ICBT email is accepted	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-02	User registration	Password validation	Reject weak password and mismatched passwords	short; mismatched confirm password	Run automated validator test in server/___tests___/validators.test.js	Validation errors returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-03	User registration	Registration API	Block duplicate email registration	Existing registered email	Run API test in server/___tests___/sprint1-api.test.js	API returns duplicate email error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-01	User registration	Registration API	Create account with valid details	Valid ICBT email, password, profile data	Run API test in server/___tests___/sprint1-api.test.js	Account, token, and profile are created	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-02	User registration	Registration API	Reject registration with invalid email	Invalid email address	Run API test in server/___tests___/sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-04A	Authentication	Password security	Hash passwords and verify without storing plain text	Password123	Run auth unit test in server/___tests___/auth.test.js	Password hash differs from plain text and verifies correctly	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-04B	User registration	Password security	Store hashed registration password	New user registration payload	Run API test in server/___tests___/sprint1-api.test.js	Database stores hash, not plain password	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-05	User login	Login API	Authenticate valid login credentials	Existing email and correct password	Run API test in server/___tests___/sprint1-api.test.js	API returns 200 and token	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-06	User login	Login API	Reject incorrect password	Existing email and wrong password	Run API test in server/___tests___/sprint1-api.test.js	API returns unauthorized response	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-07	Authentication	Protected routes	Deny access without token	No authorization token	Run API test in server/___tests___/sprint1-api.test.js	API returns unauthorized response	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-06	Profile handling	Profile API	Display authenticated user's own profile	Valid driver token	Run API test in server/___tests___/sprint1-api.test.js	Own user/profile data is returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-07	Profile handling	Profile API	Update valid profile details	Valid profile update payload	Run API test in server/___tests___/sprint1-api.test.js	Profile and user name update successfully	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-08A	Profile handling	Profile validation	Reject invalid profile data	Empty first name / phone number	Run automated validator test in server/___tests___/validators.test.js	Validation errors returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-08B	Profile handling	Profile API	Reject invalid profile update data	Invalid profile payload	Run API test in server/___tests___/sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed

Test ID	Related User Story	Feature/Module	Test Scenario	Test Data	Test Steps / Test Script	Expected Result	Actual Result	Status	Evidence Reference
UT-09	Privacy access control	Profile privacy	Deny access to another user's profile	Driver token requesting passenger profile	Run API test in server/ __tests__ / sprint1-api.test.js	API returns forbidden response	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-10A	Ride-offer creation	Ride validation	Reject ride offer with zero seats	availableSeats: 0	Run automated validator test in server/ __tests__ / validators.test.js	Validation error returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-10B	Ride-offer creation	Ride API	Reject ride offer with zero seats	Driver token, zero seats	Run API test in server/ __tests__ / sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-11	Ride-offer creation	Ride API	Reject ride offer with negative seats	Driver token, availableSeats: -1	Run API test in server/ __tests__ / sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-12	Ride-offer creation	Ride API	Reject ride offer missing origin	Empty origin	Run API test in server/ __tests__ / sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-13	Ride-offer creation	Ride API	Reject ride offer missing destination	Empty destination	Run API test in server/ __tests__ / sprint1-api.test.js	API returns validation error	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-14	Ride-offer creation	Ride API	Link created ride offer to authenticated driver	Valid ride offer payload + driver token	Run API test in server/ __tests__ / sprint1-api.test.js	Created offer contains authenticated driver ID	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-15	Ride-offer listing	Ride API	Return only active offers for authenticated driver	Driver token with active/ completed offers	Run API test in server/ __tests__ / sprint1-api.test.js	Only active own offers are returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-16	Authorization	Driver-only access	Deny passenger access to ride-offer creation	Passenger token + ride payload	Run API test in server/ __tests__ / sprint1-api.test.js	API returns forbidden response	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
API-17	Privacy access control	Ride details API	Return only authenticated driver's own ride detail	Own ride ID and another driver's ride ID	Run API test in server/ __tests__ / sprint1-api.test.js	Own offer returns success; other driver's offer is blocked	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-01	US-13 Search Ride Offers	Ride Search API	Search with valid route and time-window criteria	origin=Maharagama&destination=ICBT	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	Eligible active ride offers are displayed	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-02	US-13 Search Ride Offers	Ride Search API	Search with no matching route/time criteria	origin=Galle&destination=Kandy	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	No-result message or empty result response is returned cleanly	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-03	US-14 Offer Details	Public Offer Detail API	Open a matching offer	Valid rideOfferId	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	Correct route, time, seats, status and limited owner/profile data displayed	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-04	US-15 Join Request Creation	JoinRequest API	Submit valid join request for another user's active offer	rideOfferId + requestNote	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	Pending JoinRequest is created with rideOfferId, requesterUserId, ownerUserId	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-05	US-15 Join Request Creation	JoinRequest API	Submit duplicate active request for the same offer	Existing Pending request for same offer	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	Duplicate request is blocked (409 Conflict)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-06	US-15 Join Request Creation	JoinRequest API	Owner attempts to request own offer	requesterUserId === ownerUserId	Run API test in server/ __tests__ / sprint2-tdd-spec.test.js	Self-request is blocked (422 Unprocessable Entity)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed

Test ID	Related User Story	Feature/Module	Test Scenario	Test Data	Test Steps / Test Script	Expected Result	Actual Result	Status	Evidence Reference
TDD-S2-07	US-15 Join Request Creation	JoinRequest API	Request full, inactive or cancelled offer	inactiveOffer / fullOffer / cancelledOffer ID	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Request is rejected (422 Unprocessable Entity)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-08	US-16 Request Status Viewing	My Requests API	View own requests	Authenticated passenger token	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Authenticated requester sees only their own request records and statuses	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
TDD-S2-09	Authorization	Protected Routes	Unauthenticated user attempts protected request action	No authorization token	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Access/action is denied (401 Unauthorized)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-01	US-13 Search Ride Offers	Search query builder	Origin/destination with extra spaces or case differences	maharagama / icbt campus	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Input is normalised and matching offers can still be found	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-02	US-13 Search Ride Offers	Active offer filter	Active and inactive offers exist	Active + inactive offers in DB	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Only eligible active offers are returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-03	US-13 Search Ride Offers	Seat availability filter	Offer with availableSeats = 0	availableSeats: 0	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Offer is excluded from request eligibility	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-04	US-14 Offer Details	Offer detail retrieval	Valid rideOfferId	Valid rideOfferId	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Offer detail response returns approved route/time/status fields	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-05	US-14 Offer Details	Offer detail privacy	Offer owner profile includes private contact data	Owner profile with phone/email	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Unapproved private fields are not returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-06	US-15 Join Request Creation	JoinRequest validation	Valid requester and active offer	Valid passenger token + rideOfferId	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Pending JoinRequest is inserted successfully	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-07	US-15 Join Request Creation	Duplicate request check	Existing Pending request for same requester and offer	Duplicate request payload	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Second request is rejected (409)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-08	US-15 Join Request Creation	Self-request check	requesterUserId equals ownerUserId	Owner token + own rideOfferId	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Request is rejected (422)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-09	US-15 Join Request Creation	Unavailable offer check	Cancelled/inactive/full offer	Inactive/full/cancelled offer IDs	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Join request is rejected (422)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-10	US-16 Request Status Viewing	Request-status filtering	User has own requests and other users' requests exist	Multiple user tokens & requests	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Only authenticated user's own requests are returned	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-11	Authorization	Protected endpoint guard	No token/session	Missing Authorization header	Run API test in server/___tests___/sprint2-tdd-spec.test.js	Request action is denied (401)	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
UT-S2-12	Quality & Stability	Sprint 1 regression	Run existing auth/profile/ride-offer tests	Full test suite execution	Run existing tests in server/___tests___/sprint1-api.test.js	Existing Sprint 1 tests still pass	Passed in Jest npm test	Passed	Terminal screenshot: npm test passed
